Continue of IDS consideration: 09/07/2004, 10/20/2004, and 10/09/2005

DETAILED ACTION

1. Claims 1-15 are presented for examination.

Response to Arguments

2. Applicant's arguments, see Remarks, page 7, filed 01/30/2006, with respect to the rejection(s) of claim(s) 1-15 under secondary Blau reference have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Hobart and Johnson.

Claim Rejections - 35 USC § 112

3. Claims 3, 8, 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. The term "may" in claim 3, 8, and 13, is a relative term which renders the claim indefinite. The term "may" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 2, 4, 6, 7, 9, 11, 12 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hobart [US Patent Application No 2002/0178255], in view of Johnson [US Patent Application No 2001/0039500].

7. As per claim 1, Hobart discloses the invention substantially as claimed including a method of provide incentives for client machines to contribute resources to a peer-to-peer computer network [i.e. reward users in a peer-to-peer network for actively or passively contributing to resources] [Abstract; and paragraph 0013], the method comprising:

receiving requests for information from a plurality of client machines [i.e. request from peer] [Figure 6; paragraphs 0045 and 0047];

determining if the client machines are contributing resources to peer-to-peer sharing [i.e. incentive program whereby peers actively or passively participating are rewarded in correlation with predetermined parameters] [80-88, Figure 6; paragraphs 0013, 0047; and claims 1 and 2].

Hobart does not specifically disclose sending the requested information to the client machines based upon a priority scheme giving priority to requests from clients which are contributing resources to peer-to-peer sharing.

Johnson discloses sending the requested information to the client machines based upon a priority scheme giving priority to requests from clients which are contributing resources to peer-to-peer sharing [i.e. award equity with different priority structures to different contributors] [paragraphs 0099-0103].

It would have been obvious to a person skill in the art at the time the invention was made to combine the teaching of Hobart and Johnson because Johnson's teaching of priority would allow to providing an orderly execution of requests to prevent system corruption.

8. As per claim 2, Johnson discloses giving higher priority in proportion to the level of resources contributed [i.e. allocating amount of equity to the individual contributor of the CTC based on the proportion of the total trading volume of the CTC which they contribute] [paragraphs 0078 and 0143].

9. As per claim 4, it is rejected for similar reasons as stated above in claims 1 and 2.

10. As per claim 6, it is rejected for similar reasons as stated above in claim 1.

11. As per claim 7, it is rejected for similar reasons as stated above in claim 2.

12. As per claim 9, it is rejected for similar reasons as stated above in claims 1 and 2.

13. As per claim 11, it is rejected for similar reasons as stated above in claim 1. Furthermore, Johnson discloses a register which maintains a queue [i.e. memory] [508, Figure 5; and paragraph 0053].

14. As per claim 12, it is rejected for similar reasons as stated above in claim 2.

15. As per claim 14, it is rejected for similar reasons as stated above in claim 1.

16. Claims 3, 5, 8, 10, 13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hobart [US Patent Application No 2002/0178255], in view of Johnson [US Patent Application No 2001/0039500], and further in view of McCoy et al. [US Patent Application No 2001/0037311].

17. As per claim 3, Hobart discloses disk space, CPU resources, memory and specified number of connecting users [paragraphs 0032-0049]. Hobart and Johnson do not specifically disclose bandwidth. McCoy discloses bandwidth [Abstract; and paragraphs 0005 and 0007]. It would have been obvious to a person skill in the art at the time the invention was made to combine the teaching of Hobart, Johnson and McCoy because McCoy's teaching of bandwidth would allow to utilize or save the unused bandwidth for other purposes.

18. As per claim 5, it is rejected for similar reasons as stated above in claim 3.

19. As per claim 8, it is rejected for similar reasons as stated above in claim 3.
20. As per claim 10, it is rejected for similar reasons as stated above in claim 3.
21. As per claim 13, it is rejected for similar reasons as stated above in claim 3.
22. As per claim 15, it is rejected for similar reasons as stated above in claim 3.
23. Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.
24. A shortened statutory period for response to this action is set to expire **3 (three) months and 0 (zero) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).
